**Soup Saves Money**

- Helps to stretch the food dollar by using perfectly good leftover foods in a new tasty dish.

Have you thrown out a bone from a pork or beef roast which had a little meat on it? How about the green beans, corn or peas that weren't eaten at dinner last night? Now you can put those leftovers or "planned overs" to good use.

**Soup Can Be Part of a Healthy Diet**

Use the ChooseMyPlate.gov to build a healthy diet.

- Ingredients for soup can include foods from several of the food groups.
- Soups can provide high quality protein, fiber, and vitamins needed for good health.
- Homemade soups can be lower in salt than canned soups if we use herbs for flavoring instead of salt.

**Plan Ahead for Making Soup**

- Freeze leftover cooked vegetables and liquid from cooked vegetables.
- Freeze leftover cooked meat to use in soup.
- When ready to make soup, add leftover frozen cooked meat and seasonings to cooked vegetables and liquid.
- Make a broth for soup from beef, pork, ham, chicken or turkey bones.

**How to Make Soup Broth**

1. Place bones and meat pieces in a large pot and cover with water.
2. Bring to a boil; simmer for 3 hours.
3. Throw bones away, remove celery leaves, and refrigerate broth and meat.
4. When broth is cold, skim fat off the top and throw fat away.
5. Freeze broth if not using within 3 days.
6. Use in recipes which call for meat broth.

**Herbs Add Flavor**

- Basil
- Bay leaf
- Parsley
- Rosemary
- Thyme
- Herb Shaker: 1 teaspoon each of rosemary and thyme, 2 teaspoons each of sage and sweet basil, and 1½ teaspoons of marjoram. Use instead of salt.
Soup-er Ideas . . . Be Creative!

- A cup of soup makes a delicious, nutritious snack.
- A cup or bowl of soup plus a sandwich or salad makes a light meal.
- In a hurry? Use your favorite condensed soup. Add extra frozen or canned vegetables and leftover cooked meat or cooked dry beans.
- Make Soup Toppers - sprinkle with:
  - homemade croutons
  - grated carrots or grated cheese
  - popcorn
  - fresh or dried herbs

Keeping Soup Safe

- If you won’t be eating the soup right after you have prepared it or you have leftover soup, chill by setting pan of hot soup in a sink filled with ice and water. Stir often until soup stops steaming.
- Put soup in smaller containers and store in refrigerator right away. Use within 3-4 days.
- Freeze soup for longer storage. Leave 1/2” space at top of container.
- Thaw frozen soups in the refrigerator or microwave. Do not thaw on the kitchen counter.
- To reheat soup, cook over low heat to a boil to reach 165 degrees. Add water if the soup is too thick.
